

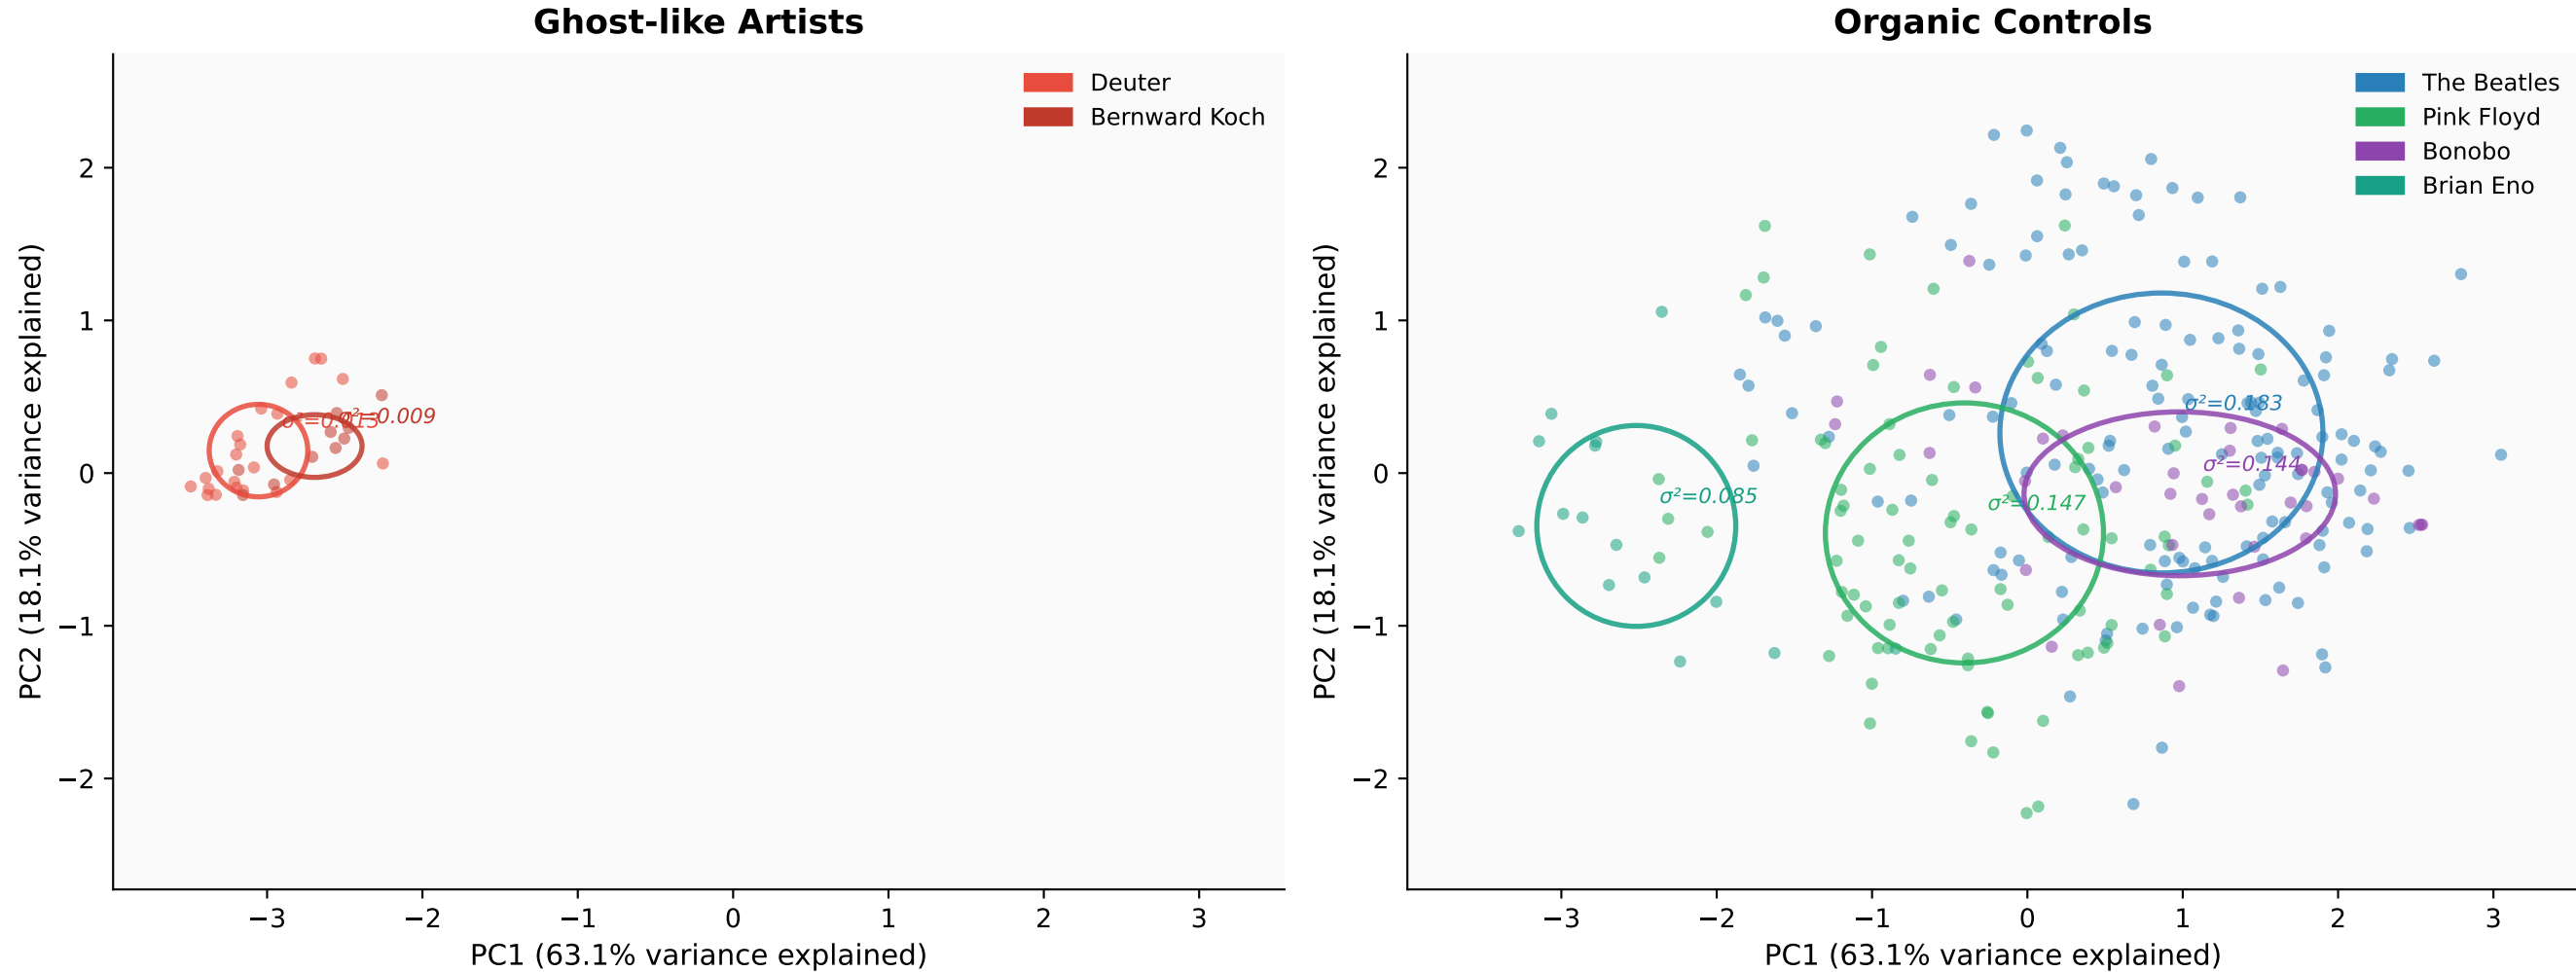

Figure 1: Catalog Coherence — Ghost-like vs. Organic Artists
(PCA of danceability, energy, valence, acousticness; 1σ ellipse shown)

*Ghost-like artists (left) cluster in a compact region of feature space — a signature of catalog optimisation for a single micro-genre.
Organic artists (right) spread freely, reflecting genuine stylistic range. Each point is one track. Ellipses = 1σ contour. Data: Kaggle 114 K-track dataset.*
